## Project Name: Stratford Elementary School, Stratford, Prince Edward Island

The new Stratford Elementary School which opened its doors in the fall of 2010 is a 5,015 square-metre, single storey educational institute designed with energy efficiency in mind. Some of the sustainable features of the building include; state-of-the art LED lighting systems in the corridors and library as well as occupancy sensors to control the lighting systems in the washrooms, classrooms, offices and storage rooms. The building also features a surveillance system, video conferencing and multimedia conference rooms, hearing impaired local sound reinforcement systems for the classrooms, fibre optic main data backbone and Local Area Network data systems all designed and installed to the current government of Prince Edward Island Cabling Standards.

The total project capital cost was approximately \$7,900,000 with a total electrical capital cost of approximately \$720,000.
